

LIONS

A lion is a mammal. They are large cats. They are golden colored. They are very fast. Lions weigh up to 420 pounds. Lions grow to 6 feet long (1.8 meters).

Lions live in plains in Africa and in zoos. Lions used to live in lots of places like southeast Europe, the Middle East, India, and Africa. Now they live only in Africa and in zoos because

they caught them and they lost their homes.

Lions live in a permanent groups called prides. Prides have up to 25 lions. A prides has one male lion and many lionesses. Females hunt for the pride. Lions are nocturnal that means they hunt at night.
